Personal Statement

I'm Paraguayan and I love programming and technology. I'm also a professional violinist. I'm someone who gets what is proposed since I think achievements are results of decisions are made and goals that each one proposes. One of my professional goals is to apply my knowledge and experience to solve problems and provide effective solutions

Experience

E-COMMERCE- 2022

Construction in 48 hours of an E-Commerce using ReactJS front-end and REST API consumption.

I used React Bootstrap for design implementation for time optimization in terms of professional design and

taking into account the UX/UI in the project.

I also applied the use of various ReactJS libraries such as React-Redux, React-Hook-Form, Thunks etc.

POKEDEX - 2022

Development and construction of a Pokédex using REST API consumption, vanilla CSS3, ReactJs.

Implementation of protected routes using React-Router.

In the Pokédex you can see the more than 1000 Pokémon with their characteristics, and you can filter by type using a search engine and also the implementation of a paginator.

Education

2022

ACADEMLO

Full stack Developer & computer science

Programming languages

HTML, CSS, Bootstrap, React
Bootstrap, node.js, React

Soft skills

Fast learning
Teamwork
Problem resolution
Patience
Communication
Creative
